CERNIERIFICO VALTOCE...DAL 1966

CERNIERIFICO VALTOCE...SINCE 1966

Fondata nel 1924 l'azienda esordì in forma artigianale sviluppandosi progressivamente. Nel 1966 la ditta si è trasferita nella attuale sede di Gravellona Toce dove, su una superficie di oltre 10.000 mq, è stato realizzato un moderno stabilimento dotato di macchinari e attrezzature di avanzata concezione tecnologica in continuo aggiornamento.

La produzione si è specializzata nella fabbricazione di cerniere, diventando un importante punto di riferimento nel settore.

La vasta gamma di prodotti comprende cerniere in acciaio galvanizzato, in ottone, in acciaio inossidabile, nonché cerniere a gambi filettati per mobili e infissi, commercializzati principalmente tramite i canali di distribuzione della ferramenta e della G.D.O.

Da diversi anni l'azienda ha affiancato alla produzione tradizionale la progettazione e fabbricazione di modelli speciali per particolari esigenze industriali, con la possibilità di soddisfare sia richieste di grandissima serie che lotti limitati. Per questi ultimi, in particolare per i modelli destinati ad impieghi gravosi con spessori di lamiera fino a 5 mm, vengono utilizzate le più avanzate tecnologie di taglio laser. L'azienda è presente commercialmente in tutta Europa, con sbocchi di vendita anche in Medio Oriente, Africa e Asia ed è ovunque rinomata per la qualità dei prodotti e la puntualità nelle consegne.

Founded in 1924, the company started out as a traditional artisan concern, growing and developing over the years.

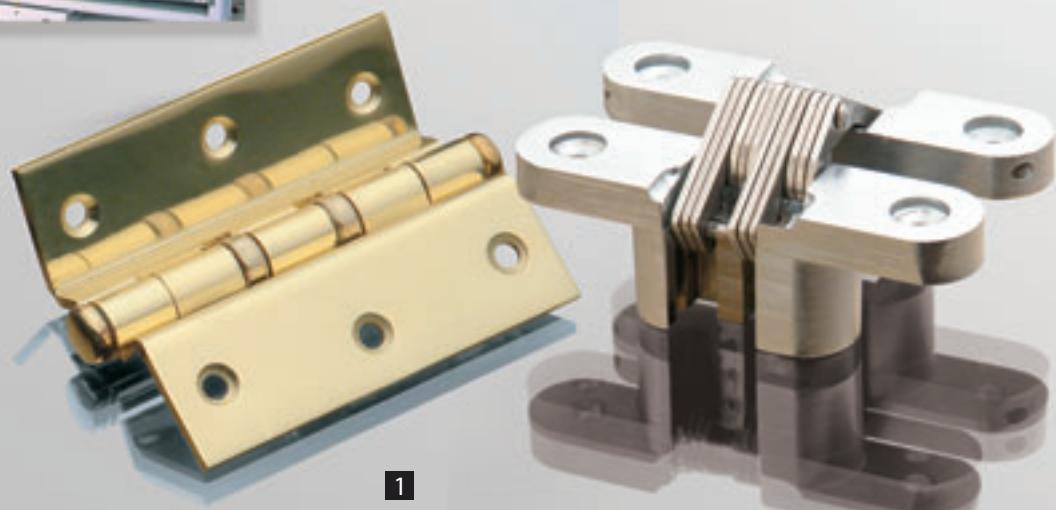

In 1966 the company moved its base to Gravellona Toce where, on a site of over 10,000 square metres, it established a modern factory equipped with the latest high tech plant and machinery which is continually updated.

The factory specialised in the production of hinges, becoming an important benchmark for the sector.

The vast range of products includes hinges in galvanised steel, brass and stainless steel as well as lift off hinges for furniture and door frames, mainly sold through ironmongers and major chain retailers.

More recently the company has, alongside its standard lines, designed and produced bespoke models for particular specialised industrial uses, and is able to fulfil both large and small production runs. For bespoke products, and in particular for products for heavy-duty use with a plate thickness of up to 5 mm, the most advanced laser cutting technology is used.

The company covers the whole of the European market and also has outlets in the Middle East, Africa and Asia. The company is renowned for both the quality of its products and the punctuality of its deliveries.
